

Art 34 Amendment

Rec'd PCT/PTO 25 OCT 2004

CLAIMS

1. (Amended) A multi-display device, wherein a plurality of basic displays or basic units are horizontally arranged, lateral basic displays or lateral basic units are connected to the central basic display or central basic unit respectively by hinge members so that a distance between the adjacent basic displays or basic units at an upper side portion of the basic display or basic unit is different from one at a lower side portion.

2. (Amended) A multi-display device according to claim 1, wherein a distance between a connection portion of a connection half positions of the hinge member to the basic display or basic unit and a center of support shaft of the hinge member connecting the mutually adjacent basic displays or basic units at an upper side portion of the hinge member is different from one at a lower side portion thereof.

3. (Amended) A multi-display device according to claim 1 or 2, wherein, in the connection using the hinge member, the upper side connection portion and a lower side connection portion are integrated in one hinge.

4. (Amended) A multi-display device according to any one of claims 1 to 3, wherein the basic display or basic
